

UNIVERSITY OF KARACHI (UOK)

ACADEMIC YEAR-2021

DEPARTMENT OF COMPUTER SCIENCE

MORNING PROGRAMME

MCS (FINAL)- 4th SEMESTER

COURSE TITLE: "ARTIFICIAL INTELLIGENCE"

COURSE CODE: CS-616

SUBMITTED TO:

TEACHER NAME: MISS SAIMA ASHRAF

SUBMITTED BY:

STUDENT NAME:

NEHA ADIL

SEAT NO:

P19101049

ENROLLMENT NO:

SCI/DCS/KU-7276/2019

"ASSIGNMENT # 02"

Question # 01:-

Q Example of Depth First Search :-

Solution:-

Stack:-

Output:-

Stack:-

Output:-

Stack:-

Output:-

Stack:

E
A
S

Output:

S A D E

E → pop D has no children,
pop from stack...

Stack:

G
A
S

Output:

S A D E G

G → pop E has no children,
pop from stack...

Stack:

S

Output:

S A D E G B

G has no children, pop
from stack...

A has children, but
they've all been visited
so pop A.

Stack:

S

Output:

S A D E G B C

B has children, but

S → pop they've been visited... doesn't
get added to stack.

Stack

Output:

S A D E G B C

C has children, but they've been
visited... doesn't get added to stack
S has children but they've all
been visited... POP S.

Question # 02 &

Q Example of Depth limited Search:-

DO it for limits 03 and 04.

For level 3:-

1)

Stack:

Output

2)

Stack:

Output

3)

Stack:

Output:

Stack:

Output:

A B E I

Stack:

Output:

A B E I F

Since I has no children, pop from Stack.

E has children, but they've all been visited so pop E.

Stack:

Output:

A B E I F C

F has no children, pop from Stack.
B has children, but they've all been visited so pop B.

Stack:

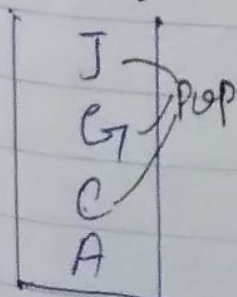

Output:

A B E I F C G

Stack:

Output:

A B E I F C G J

9) Stack :

D
A

Output :-

A B E I F C G J D

↳ J has no children, pop from stack,
 ↳ G has children, but they've all been visited so pop G.
 ↳ C has children, but they've all been visited so pop C.

10) Stack :

H
D
A

Output :

A B E I F C G J D H

11) Stack :

K
H
D
A

pop

Output :

A B E I F C G J D H K

12)

- K has no children, pop from stack.
- H has children, but they've been visited so pop H.
- D has children, but they've been visited so pop D.

Stack is empty.

- A has children but they've all been visited so pop A.

For Level 4 :-

The Stack will be same from Step # 01 to Step # 11. from Level # 03.

So we continue from Step # 11 to proceed further for level 4.

Step # 11v

Stack

K
H
D
A

Output:

A B E I F C G J D H K

12) Stack:

L	pop
K	
H	
D	
A	

Output:

A B E I F C G J D H K L

13) Stack:

M
K
H
D
A

Output:

A B E I F C G J D H K L M

L has no children, pop from stack.

(14)

Stack :

- M has no children, pop from stack.
- K has children, but they all have been visited so pop K.
- H has children, but they've all been visited so pop H.
- D has children but they've all been visited so pop D.
- A has children but they've all been visited so pop A.

Output :-

A B E I F C G J D H K L M Ans.

Question # 036

Example of Iterative Depth Search

Solution v

Consider Level 0 :-

Stack.

Output :

Ans

Consider Level 1 :-

B, C, D has no children, pop from stack.

A has children, but they all have been visited so pop A.

Output :-

Ans

Consider Level 2 :-

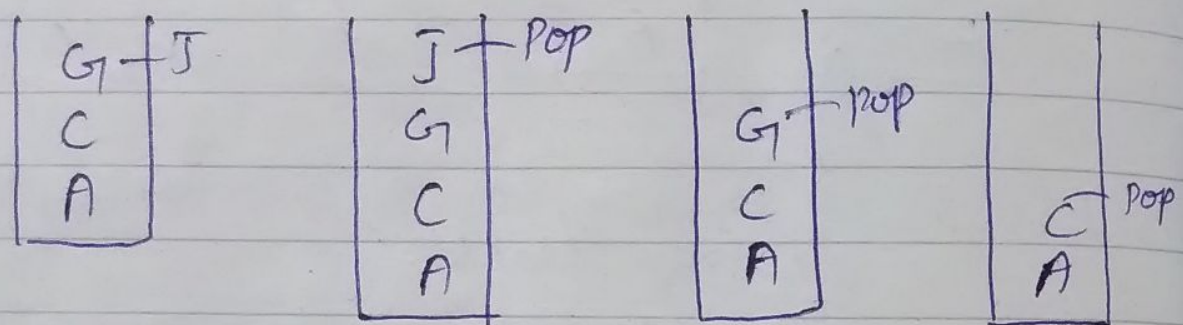

↓
Empty

Output :-

Ans

Consider level 3 :-

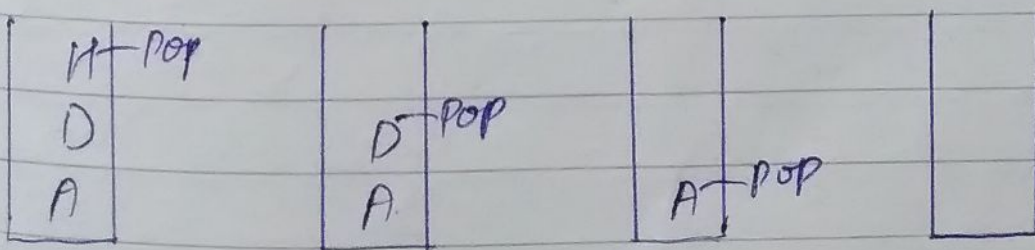

Output :-

~~ABCE~~
 ABEIFCGJDHK

~~A~~

Consider Level 4 &

Output &

A B E I F C G J D H K L M

Av

IDS Traversal Output

level

0

A

1

A B C D

2

A B E F C G D H

3

A B E ~~I~~ F C G J D H K

4

A B E I F C G J D H K L M
